**Inclosure Material:**

Plastic

**Component Name And Quantity:**

5 transistor

**Mounting Method:**

Terminal

**Semiconductor Material:**

Silicon single transistor

**Voltage Rating In Volts Per Characteristic:**

20.0 collector to base voltage, dc single transistor

**Current Rating Per Characteristic:**

20.00 milliamperes all primaries preset single transistor

**Maximum Operating Temperature Per Measurement Point:**

150.0 degrees celsius junction

**Terminal Type And Quantity:**

14 pin

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A110a0
