End Application:

Ari 23338

Special Features:

Manufacturer nomenclature tuning varactor; silicon abrupt junction devices offer highest q and lowest resistance available in 30 volt tuning diodes; silicon dioxide passivation process assures greater stability, reliability and low leakage currents at higher temperatures; used for narrow and wide band tuning through x-band; operating temperature -55 to +150 degrees c

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A110a0
