Overall Length:

2.300 inches

Overall Diameter:

0.145 inches

Operating Temperature Range:

-65.0/+175.0 degrees celsius

End Application:

Electronic component assembly

Absolute Maximum Voltage Rating In Volts Per Characteristic:

880.0 reverse breakdown voltage, dc and 800.0 peak inverse voltage

Mounting Method:

Surface

Criticality Code Justification:

Agav

Special Features:

General purpose rectifier; having continuous rating of 5.0 amps; miniature size

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A503h0
