End Application:

Transistor

Product Name:

N-channel 1000v-1.3-7.3 to 247 powermesh mosfet

Special Features:

Extremely high dv/dt capability; 100 percent avalanche tested; very low intrinsic capacitances; gate charge minimized; +-30 v gate to source voltage rating

Special Test Features:

Switch mode power supplies (smps); dc/ac converters for welding equipment and uninterruptible power supplies and motor drive

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A110a0
