Inclosure Material:

Plastic

Overall Length:

132.0 millimeters

Overall Height:

22.0 millimeters

Overall Width:

30.0 millimeters

End Application:

Fixture, lighthigh-bay 600a-3/t5-r15

Mounting Facility Quantity:

2

Mounting Method:

Slot

Voltage Rating In Volts Per Characteristic:

120.0 base supply voltage

Current Rating Per Characteristic:

700.00 milliamperes forward current, dc megahertz

Product Name:

(inavy)led driver, 17w, 700ma; xitanium driver

Special Features:

Quantity is 5; item has class 2 electrical insulation; housing material is noryl hs2000, which is polyphemylene; weight is 60.0 grams; output voltage is 24.0 volts dc; this 17 watt driver provides a constant voltage output for operating led systems

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A110a0
