Inclosure Material:

Plastic

Overall Length:

3.0 millimeters

Overall Height:

1.1 millimeters

Overall Width:

1.4 millimeters

End Application:

Multi-mode digital radio

Mounting Method:

Compression

Features Provided:

High power and low noise

Voltage Rating In Volts Per Characteristic:

20.0 collector to base voltage, dc

Current Rating Per Characteristic:

25.0 microamperes collector current, dc

Power Rating Per Characteristic:

300.0 watts total power dissipation

Product Name:

Transistor, rf; cage: npn 5ghz wideband transistor

Terminal Type And Quantity:

3 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A110a0
