Overall Length:

0.114 inches

Component Name And Quantity:

3 semiconductor device diode

Mounting Method:

Terminal

Voltage Rating In Volts Per Characteristic:

250.0 reverse voltage, peak 3rd semiconductor device diode

Current Rating Per Characteristic:

225.0 milliamperes forward current, peak total value 1st semiconductor device diode

Power Rating Per Characteristic:

225.0 milliwatts total device dissipation 2nd semiconductor device diode

Product Name:

Dual series high voltage switching diode

Terminal Type And Quantity:

3 bonding pad

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A110a0
