End Application:

Precision approach path indicator system fa-24000 (papidme)

Special Features:

Diode case style: to-220ac; single diode configuration; fast recovery; forward current- i (av) : 15a; forward surge current ifsm maximum 180a; forward voltage vf maximum 2.1v; 2 pins; operating temperature 175degrees c maximum and min minus 65 degrees c; repetitive reverse voltage vrrm max: 600v; reverse recovery time trr maximum 35ns

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A110a0
