## NSN 5962-00-421-0224

Digital Microcircuit - Page 1 of 1

| View Online at https://aerobasegroup.com/nsn/5962-00-421-0224          |
|------------------------------------------------------------------------|
| Body Length:                                                           |
| Between 0.240 inches and 0.275 inches                                  |
| Body Width:                                                            |
| Between 0.240 inches and 0.260 inches                                  |
| Body Height:                                                           |
| Between 0.030 inches and 0.070 inches                                  |
| Maximum Power Dissipation Rating:                                      |
| 88.0 milliwatts                                                        |
| Operating Tempurature Range:                                           |
| -55.0/+125.0 degrees celsius                                           |
| Storage Tempurature Range:                                             |
| -65.0/+150.0 degrees celsius                                           |
| Features Provided:                                                     |
| Monolithic and hermetically sealed and positive outputs and high speed |
| Inclosure Material:                                                    |
| Ceramic and glass                                                      |
| Inclosure Configuration:                                               |
| Flat pack                                                              |
| Output Logic Form:                                                     |
| Transistor-transistor logic                                            |
| Input Circuit Pattern:                                                 |
| Quad 2 input                                                           |
| Design Function And Quantity:                                          |
| 4 gate, nand                                                           |
| Case Outline Source And Designator:                                    |
| T0-86 joint electron device engineering council                        |
| Time Rating Per Chacteristic:                                          |
| 6.00 nanoseconds propagation delay time, low to high level output      |
| Shelf Life:                                                            |
| N/a                                                                    |
| Unit Of Measure:                                                       |
|                                                                        |
| Demilitarization:                                                      |
| Yes - demil/mli                                                        |
| Fiig:                                                                  |
