| Body Length:                                                                                                                           |
|----------------------------------------------------------------------------------------------------------------------------------------|
| 0.280 inches                                                                                                                           |
| Body Width:                                                                                                                            |
| Between 0.240 inches and 0.260 inches                                                                                                  |
| Body Height:                                                                                                                           |
| Between 0.030 inches and 0.085 inches                                                                                                  |
| Maximum Power Dissipation Rating:                                                                                                      |
| 120.0 milliwatts                                                                                                                       |
| Operating Tempurature Range:                                                                                                           |
| -55.0/+125.0 degrees celsius                                                                                                           |
| Storage Tempurature Range:                                                                                                             |
| -65.0/+150.0 degrees celsius                                                                                                           |
| Features Provided:                                                                                                                     |
| Hermetically sealed and monolithic and positive outputs and w/totem pole output                                                        |
| Inclosure Material:                                                                                                                    |
| Ceramic and glass                                                                                                                      |
| Inclosure Configuration:                                                                                                               |
| Flat pack                                                                                                                              |
| Output Logic Form:                                                                                                                     |
| Transistor-transistor logic                                                                                                            |
| Input Circuit Pattern:                                                                                                                 |
| Triple 3 input                                                                                                                         |
| Design Function And Quantity:                                                                                                          |
| 3 gate, nand                                                                                                                           |
| Case Outline Source And Designator:                                                                                                    |
| F-1 mil-m-38510                                                                                                                        |
| Terminal Surface Treatment:                                                                                                            |
| Solder                                                                                                                                 |
| Voltage Rating And Type Per Characteristic:                                                                                            |
| 5.5 volts power source                                                                                                                 |
| Time Rating Per Chacteristic:                                                                                                          |
| 3.00 nanoseconds propagation delay time, low to high level output and 27.00 nanoseconds propagation delay time, low to high level      |
| output and 3.00 nanoseconds propagation delay time, high to low level output and 24.00 nanoseconds propagation delay time, high to low |
| level output                                                                                                                           |
|                                                                                                                                        |

### **Test Data Document:**

81349-mil-m-38510 specification (includes engineering type bulletins, brochures, etc., that reflect specification type data in specification format; excludes commercial catalogs, industry directories, and similar trade publications, reflecting general type data on certain environmental and performance requirements and test conditions that are shown as "typical", "average", "", etc.).

### Terminal Type And Quantity:

14 flat leads

#### **Specification Data:**

81349-mil-m-38510/1 government specification

## Shelf Life:

Unit Of Magaz

N/a

# NSN 5962-00-436-0830

Digital Microcircuit - Page 2 of 2

## Demilitarization:

Yes - demil/mli

Fiig:

A458a0
