End Application:

Semiconductors-group 17s

Input Circuit Pattern:

2 stage

Special Features:

Bdifferential input/output, integrated circuit video amplifier, circuit features emitter-follower outputs, internal frequency compensation and fixed gains of 10, 100, or 400 without external components

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
