Body Length:

Between 0.745 inches and 0.755 inches

Body Width:

Between 0.245 inches and 0.252 inches

Operating Temperature Range:

+0.0/+70.0 degrees celsius

Features Provided:

Monolithic

Inclosure Configuration:

Flat pack

Output Logic Form:

Transistor-transistor logic

Design Function And Quantity:

1 gate, nand

Case Outline Source And Designator:

-318 joint electron device engineering council

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
