Body Length:

Between 1.180 inches and 1.220 inches

Body Width:

Between 0.585 inches and 0.615 inches

Operating Temperature Range:

-40.0/+85.0 degrees celsius

Features Provided:

Programmable and synchronous

Inclosure Material:

Ceramic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Transistor-transistor logic

Design Function And Quantity:

1 selector, data

Terminal Type And Quantity:

24 printed circuit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
