Body Length:

Between 0.740 inches and 0.760 inches

Body Width:

Between 0.240 inches and 0.260 inches

Operating Temperature Range:

+0.0/+75.0 degrees celsius

Features Provided:

Resettable and retriggerable and schottky

Inclosure Material:

Plastic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Transistor-transistor logic

Design Function And Quantity:

2 multivibrator, monostable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
