## NSN 5962-01-091-7606

Digital Microcircuit - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5962-01-091-7606

| Body Length:                          |
|---------------------------------------|
| Between 1.235 inches and 1.290 inches |
| Operating Tempurature Range:          |
| -55.0/+125.0 degrees celsius          |
| Inclosure Material:                   |
| Ceramic and glass                     |
| Inclosure Configuration:              |
| Dual-in-line                          |
| Output Logic Form:                    |
| Transistor-transistor logic           |
| Input Circuit Pattern:                |
| 11 input                              |
| Special Features:                     |
| As differentiated by programming      |
| Shelf Life:                           |
| N/a                                   |
| Unit Of Measure:                      |
|                                       |
| Demilitarization:                     |
| Yes - demil/mli                       |
| Fiig:                                 |
