Body Length:

17.80 millimeters

Body Height:

3.50 millimeters

Maximum Power Dissipation Rating:

200.0 milliwatts

Operating Temperature Range:

-30.0/+75.0 degrees celsius

Storage Temperature Range:

-55.0/+125.0 degrees celsius

End Application:

Avtr test set

Features Provided:

Bipolar and monolithic

Inclosure Configuration:

Dual-in-line

Design Function And Quantity:

1 amplifier, preamplifier

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
