Body Length:

3.126 inches

Body Width:

2.625 inches

Body Height:

0.200 inches

Maximum Power Dissipation Rating:

1.9 watts

Operating Temperature Range:

-55.0/+105.0 degrees celsius

Storage Temperature Range:

-55.0/+125.0 degrees celsius

End Application:

B52g/h

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Transistor-transistor logic

Design Function And Quantity:

1 converter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
