| <b>Body Outside Diameter:</b>         |
|---------------------------------------|
| 0.875 inches                          |
| Body Height:                          |
| Between 0.250 inches and 0.450 inches |
| Operating Tempurature Range:          |
| -55.0/+125.0 degrees celsius          |
| Features Provided:                    |
| Hermetically sealed                   |
| Inclosure Configuration:              |
| Can                                   |
| Design Function And Quantity:         |
| 1 regulator, voltage                  |
| Terminal Surface Treatment:           |
| Gold or tin                           |
| Shelf Life:                           |
| N/a                                   |
| Unit Of Measure:                      |
|                                       |
| Demilitarization:                     |
| Yes - demil/mli                       |
| Fiig:                                 |
| A458a0                                |
|                                       |
|                                       |
|                                       |
