Body Length:

0.750 inches

Body Width:

0.250 inches

Body Height:

0.125 inches

Maximum Power Dissipation Rating:

500.0 milliwatts

Operating Temperature Range:

-55.0/+125.0 degrees celsius

Storage Temperature Range:

-65.0/+150.0 degrees celsius

Inclosure Material:

Ceramic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Transistor-diode-resistor logic

Input Circuit Pattern:

6 channel and 6 input

Design Function And Quantity:

6 driver, line

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
