**Operating Temperature Range:**

-55.0/+125.0 degrees celsius

**Features Provided:**

Bipolar and fixed mask and hermetically sealed and programmable

**Inclosure Material:**

Silicon

**Inclosure Configuration:**

Dual-in-line

**Output Logic Form:**

Transistor-transistor logic

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A458a0
