Operating Temperature Range:

-55.0/+100.0 degrees celsius

Features Provided:

Delay, d-type and ultraviolet erasable

Inclosure Material:

Silicon

Inclosure Configuration:

Dual-in-line

Output Logic Form:

N-type metal oxide-semiconductor logic

Design Function And Quantity:

1 programmer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
