## NSN 5962-01-145-9826

Digital Microcircuit - Page 1 of 1

962-01-145-9826

| View Online at https://aerobasegroup.com/nsn/59 |
|-------------------------------------------------|
| Body Length:                                    |
| Between 0.755 inches and 0.785 inches           |
| Body Width:                                     |
| Between 0.245 inches and 0.280 inches           |
| Body Height:                                    |
| 0.180 inches                                    |
| Operating Tempurature Range:                    |
| -55.0/+125.0 degrees celsius                    |
| Storage Tempurature Range:                      |
| -65.0/+150.0 degrees celsius                    |
| Features Provided:                              |
| Monolithic and w/strobe and w/buffered output   |
| Inclosure Material:                             |
| Ceramic                                         |
| Inclosure Configuration:                        |
| Dual-in-line                                    |
| Output Logic Form:                              |
| Transistor-transistor logic                     |
| Design Function And Quantity:                   |
| 1 selector, data, multiplexer, two to one line  |
| Terminal Surface Treatment:                     |
| Solder                                          |
| Voltage Rating And Type Per Characteristic:     |
| 7.0 volts power source                          |
| Terminal Type And Quantity:                     |
| 16 printed circuit                              |
| Shelf Life:                                     |
| N/a                                             |
| Unit Of Measure:                                |
| -                                               |
| Demilitarization:                               |
| Yes - demil/mli                                 |
|                                                 |
