Body Length:

0.875 inches

Body Width:

0.250 inches

Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Monolithic

Inclosure Material:

Glass and metal

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Transistor-transistor logic

Input Circuit Pattern:

5 input

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
