Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Hermetically sealed

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Transistor-transistor logic

Design Function And Quantity:

1 decoder, one of sixteen line

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
