Operating Temperature Range:

-55.0/+125.0 degrees celsius

Storage Temperature Range:

-65.0/+150.0 degrees celsius

End Application:

Sac digital network

Features Provided:

Hermetically sealed and electrostatic sensitive and selected item

Inclosure Material:

Glass or ceramic or metal

Inclosure Configuration:

Dual-in-line

Criticality Code Justification:

Feat

Design Function And Quantity:

1 oscillator, crystal controlled

Case Outline Source And Designator:

D-2 mil-m-38510

Terminal Surface Treatment:

Solder or tin

Special Features:

Electrostatic discharge sensitive

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A458a0
