| Body Length:                                   |
|--|
| 0.208 inches                                   |
| <b>Body Outside Diameter:</b>                  |
| 0.450 inches                                   |
| Operating Tempurature Range:                   |
| -54.0/+125.0 degrees celsius                   |
| Features Provided:                             |
| Cascadable and hermetically sealed             |
| Inclosure Material:                            |
| Metal  |
| Inclosure Configuration:                       |
| Can  |
| Design Function And Quantity:                  |
| 1 amplifier, radio frequency                   |
| Case Outline Source And Designator:            |
| T0-8 joint electron device engineering council |
| Shelf Life:                                    |
| N/a  |
| Unit Of Measure:                               |
|  |
| Demilitarization:                              |
| Yes - demil/mli                                |
