Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Programmable and hermetically sealed and monolithic

Inclosure Material:

Ceramic

Inclosure Configuration:

Flat pack

Output Logic Form:

Transistor-transistor logic

Design Function And Quantity:

1 shift register

Terminal Surface Treatment:

Solder

Terminal Type And Quantity:

16 flat leads

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
