Body Length:

0.750 inches

Body Width:

0.250 inches

Body Height:

0.125 inches

Maximum Power Dissipation Rating:

400.0 milliwatts

Operating Temperature Range:

-55.0/+125.0 degrees celsius

End Application:

Automated radar terminal system (arts2e)

Features Provided:

W/open collector and hermetically sealed and programmable and programmed

Inclosure Material:

Ceramic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Transistor-transistor logic

Input Circuit Pattern:

5 input

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
