|------------------------------------------------------------------|
| Body Length:                                                     |
| Between 0.755 inches and 0.785 inches                            |
| Body Width:                                                      |
| Between 0.265 inches and 0.291 inches                            |
| Body Height:                                                     |
| Between 0.170 inches and 0.219 inches                            |
| Operating Tempurature Range:                                     |
| -55.0/+125.0 degrees celsius                                     |
| Features Provided:                                               |
| Programmed and 3-state output and burn in, mil-std-883, class b  |
| Inclosure Material:                                              |
| Ceramic                                                          |
| Inclosure Configuration:                                         |
| Dual-in-line                                                     |
| Criticality Code Justification:                                  |
| Feat                                                             |
| Special Features:                                                |
| As differentiated by program                                     |
| Shelf Life:                                                      |
| N/a                                                              |
| Unit Of Measure:                                                 |
|                                                                  |
| Demilitarization:                                                |
| Yes - demil/mli                                                  |
| Fiig:                                                            |
| A458a0                                                           |
