Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Burn in, mil-std-883, class b and low power and schottky

Inclosure Material:

Ceramic

Output Logic Form:

Transistor-transistor logic

Input Circuit Pattern:

Dual 14 channel

Design Function And Quantity:

8 transceiver

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
