Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Programmable

Inclosure Material:

Plastic and ceramic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Metal oxide-semiconductor logic

Design Function And Quantity:

1 timer, interval

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
