| Body Length:                          |
|---------------------------------------|
| 0.810 inches                          |
| Body Width:                           |
| Between 0.270 inches and 0.305 inches |
| Body Height:                          |
| Between 0.105 inches and 0.145 inches |
| Operating Tempurature Range:          |
| -55.0/+125.0 degrees celsius          |
| Inclosure Material:                   |
| Glass and metal                       |
| Inclosure Configuration:              |
| Dual-in-line                          |
| Input Circuit Pattern:                |
| Dual 2 input                          |
| Design Function And Quantity:         |
| 2 comparator, voltage                 |
| Terminal Surface Treatment:           |
| Tin                                   |
| Shelf Life:                           |
| N/a                                   |
| Unit Of Measure:                      |
|                                       |
| Demilitarization:                     |
| Yes - demil/mli                       |
| Fiig:                                 |
| A458a0                                |
|                                       |
|                                       |
|                                       |
