Body Length:

0.165 inches

Body Outside Diameter:

0.335 inches

Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Low power and compatible cmos

Inclosure Configuration:

Can

Output Logic Form:

Transistor-transistor logic

Design Function And Quantity:

1 counter, divide by eight

Case Outline Source And Designator:

T0-5 joint electron device engineering council

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
