

View Online at <https://aerobasegroup.com/nsn/5962-01-291-4131>

Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Compatible cmos and high performance and high speed and cascadable

Inclosure Material:

Ceramic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Complementary-metal oxide-semiconductor logic and n-type metal oxide-semiconductor logic and transistor-transistor logic

Input Circuit Pattern:

4 wide 2 input

Design Function And Quantity:

2 decoder, one of eight line and 2 latch, addressable

Case Outline Source And Designator:

7a joint electron device engineering council

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
