Body Length:

3.200 inches

Body Width:

0.800 inches

Body Height:

Between 0.136 inches and 0.182 inches

Operating Temperature Range:

+0.0/+70.0 degrees celsius

Features Provided:

Hermetically sealed and monolithic and bipolar

Inclosure Material:

Ceramic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Transistor-transistor logic

Design Function And Quantity:

1 converter, analog to digital

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
