Operating Tempurature Range:
-55.0/+125.0 degrees celsius
Features Provided:
Programmable and burn in, $$ mil-std-883, $$ class b and schottky and bipolar $$
Inclosure Material:
Ceramic
Inclosure Configuration:
Dual-in-line
Output Logic Form:
Transistor-transistor logic
Design Function And Quantity:
1 array, logic
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
Yes - demil/mli
