Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Hermetically sealed and burn in, mil-std-883, class b

Inclosure Material:

Glass or ceramic or metal

Design Function And Quantity:

1 amplifier, operational, general purpose

Terminal Surface Treatment:

Solder

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
