Body Length:

Between 2.040 inches and 2.060 inches

Body Width:

Between 0.530 inches and 0.550 inches

Operating Temperature Range:

+0.0/+70.0 degrees celsius

Features Provided:

Low power and bidirectional

Inclosure Material:

Plastic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Complementary-metal oxide-semiconductor logic

Design Function And Quantity:

1 timer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
