Body Length:

1.060 inches

Operating Temperature Range:

-55.0/+125.0 degrees celsius

End Application:

Command and control section, torpedo mk50

Output Logic Form:

Complementary-metal oxide-semiconductor logic

Design Function And Quantity:

1 transceiver

Special Features:

Supply voltage 8 volt max

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
