Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Low voltage and high gain and low drift and low noise

Inclosure Material:

Metal

Inclosure Configuration:

Can

Design Function And Quantity:

2 amplifier, operational, general purpose

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
