Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Buffered reset and bipolar and burn in, mil-std-883, class c and low power

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Complementary-metal oxide-semiconductor logic

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
