Operating Temperature Range:

+0.0/+70.0 degrees celsius

Features Provided:

Bipolar and internally compensated and monolithic and low voltage and low noise

Inclosure Material:

Plastic

Inclosure Configuration:

Dual-in-line

Design Function And Quantity:

1 amplifier, operational, dc

Terminal Type And Quantity:

8 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
