**Operating Temperature Range:**

+0.0/+70.0 degrees celsius

**Features Provided:**

Bipolar and internally compensated and monolithic and low voltage and low noise

**Inclosure Material:**

Plastic

**Inclosure Configuration:**

Dual-in-line

**Design Function And Quantity:**

1 amplifier, operational, dc

**Terminal Type And Quantity:**

8 pin

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A458a0
