Aircraft model f-14a/b

Special Features:

Device is electrostatic discharge sensitive and is fully enclosed in antistatic tubes with sufficient permanent conductivity on all outside surfaces to permit controlled bleed-off of static charges and of sufficient outside-to-inside resistivity, low level input voltage 0.8v max., high level input voltage 2.0v min., low level output voltage 0.4v max., high level output voltage 2.4v min., low level input current -1.6ma max., high level input current 60ua max., power supply current 50ma
