Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Low power and burn in, mil-std-883, class b and programmable

Inclosure Material:

Ceramic

Output Logic Form:

Complementary-metal oxide-semiconductor logic

Design Function And Quantity:

1 array, logic

Terminal Type And Quantity:

84 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
