Operating Temperature Range:

-20.0/+85.0 degrees celsius

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Complementary-metal oxide-semiconductor logic

Design Function And Quantity:

2 timer and 1 counter

Terminal Type And Quantity:

16 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
