Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Low power and high speed and monolithic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Complementary-metal oxide-semiconductor logic

Design Function And Quantity:

2 switch, analog, single pole double throw

Terminal Type And Quantity:

16 printed circuit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
