Operating Temperature Range:

-55.0/+125.0 degrees celsius

Storage Temperature Range:

-65.0/+150.0 degrees celsius

End Application:

Milstar

Features Provided:

Hermetically sealed

Inclosure Configuration:

Pin grid array

Criticality Code Justification:

Feat

Design Function And Quantity:

1 microprocessor

Product Name:

Mckt digital, microprocessor 16 bit, monolithic, 8-mhz

Special Features:

Esd; hci. Selected from p/n 49956 g371926-1, mfg p/n 34649 8501001xx

Terminal Type And Quantity:

68 beam lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
