Maximum Power Dissipation Rating:

40.0 watts

Operating Temperature Range:

+0.0/+125.0 degrees celsius

Inclosure Material:

Metal

Inclosure Configuration:

Can

Design Function And Quantity:

1 regulator, voltage

Special Features:

W/overload protection

Terminal Type And Quantity:

3 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
