Operating Temperature Range:

+0.0/+70.0 degrees celsius

Features Provided:

W/schmitt trigger and low power and schottky

Output Logic Form:

Transistor-transistor logic

Design Function And Quantity:

6 gate, and-or invert

Terminal Type And Quantity:

14 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
